

SHORT CORPORATE COURSE

EXPORT PROCEDURES and DOCUMENTATION

This course provides the exporter with a valuable introduction to International Trade Documentation and Export Procedures, which covers the Import and Export Functions.

A myriad of import/export regulations face the company involved in international trade, including difficulties with export documentation, delays on shipment or getting paid, not to mention penalties for non-compliance.

The update to Incoterms 2010 is in force from 1 January 2011, covering significant changes and interpretation of these rules.

OBJECTIVES: This one day course provides the Exporting or Logistics company with a valuable update to International Trade and Documentation procedures.

COURSE BENEFIT ASSURANCE

A detailed review of your customs and trade issues will take place with a pre-course questionnaire review followed by ongoing support for the week following the course.

TARGET AUDIENCE: This course is a must for those supervisory and key personnel expanding their markets worldwide and for those planning to trade with new international markets.
